ELEGANTLY BALANCED, LIGHT WEIGHT AND EASY TO USE

# Changing the Way You See

Clinicians are now able to achieve a higher standard of care

**Nu-Bird Suction Mirror**, a high-volume instrument used for suction, viewing, and retraction, ultrasonic scaling and sealant placement procedures.

The patent design provides an exceptional 180° viewing. Suction holes are located on the front in direct contact with the reflective surface and the back to keep water and debris off and away from the mirror for clear viewing.

**Ask About Our Special Offer**

See clearly the distals of the maxillary molars

Strong tongue retraction

Clear View when using water on anterior teeth.

Retract tight cheeks to access the distal buccals of the molars with suction
